Business Project Objectives

Project process workflow

Data cleaning and transformation with **SQL management Studio 19** as a tool and language -> Creation of Dashboard using **Power BI** as a tool.

- Create internet sales reports with visual dashboards.
- How much has the business sold and which products are they?
- Able to filter through each salesperson working on different products and customers.
- Use the budget spreadsheet provided to compare the business values against Performance.
- Do an analysis of sales looking 2 years back in time using the budget spreadsheet for 2021?
